

# MICA POWDER

**Purity**  
**>99%**

**NS6130-12-000085**

**CAS**

**12001-26-2**

Mica, a chemically complex mineral, is an important electrical insulating material with the added advantage of high resistance to high temperatures. Besides, it is flexible, tough, transparent and chemically stable. Mica has low head conductivity coupled with great dielectric strength. mica powders and pigment powders are used in the cosmetics industry. In fact, a combination of pigments and mica powder is used to create eye shadow, blush, and powdered foundation makeup. These can be used with polymer clay.

## Technical Specification

Molecular Weight	Mol Formula	Melting Point	APS
256.24g/mol	$Al_2K_2O_6Si$	1250°C	40-60µm

ISO 9001:2015  
 CERTIFIED COMPANY
