Glucosamine sulfate is a natural sugar found in and around the fluid and tissues that cushion your joints. This tissue is called cartilage. It can also be made in a laboratory. Glucosamine sulfate is taken by mouth for osteoarthritis, glaucoma, weight loss, joint pain caused by drugs, a bladder condition called interstitial cystitis, jaw pain, joint pain including knee pain, back pain, multiple sclerosis, and HIV/AIDS. Glucosamine is also in some skin creams used to control arthritis pain. These creams usually contain camphor and other ingredients in addition to glucosamine. Glucosamine sulfate is used parenterally for osteoarthritis.
