Aquarium Carbon Powder

NS6130-12-000682

Quick Facts

FORMULA	C
FORM	Powder
CAS	7440-44-0

* This image is for graphic purposes only and does not represent the actual product.

TECHNICAL SPECIFICATIONS

99.9 %
Purity

1-10 μ m
Particle size - APS

12.01g/mol
Molecular weight

Applications

From chemical reactions to industrial processes.

Aquarium carbon, also known as activated carbon or activated charcoal, is a type of granular activated carbon that is specifically designed for use in aquariums to help maintain water quality. Aquarium carbon is used to remove impurities and pollutants from aquarium water, such as dissolved organic compounds, heavy metals, chlorine, and some medications. It can also help to eliminate odors and discoloration in the water, resulting in a cleaner and clearer environment for aquatic life.

PACK SIZES

25 g / 50 g / 100 g / 500 g / Bulk orders
