

NS6130-12-000930

Quick Facts

Product	:	Epoxy Resin (coating)
Stock No	:	NS6130-12-000930
CAS	:	12136-78-6
Purity	:	99%

EPOXY RESIN (coating)

Purity
99%

Technical Specification

Coefficient of Thermal Expansion	Resistance Rate
$5.1 \times 10^{-6} \text{ K}^{-1}$	$21 \times 10^{-6} \Omega \cdot \text{cm}$

Epoxy resin is a type of synthetic thermosetting polymer that is widely used as a coating material for various surfaces. Epoxy resin coatings are popular for their excellent properties, such as high chemical and heat resistance, water resistance, and mechanical strength. They are commonly used as a protective coating for concrete floors, wood surfaces, countertops, and other surfaces that require a high level of durability and resistance to wear and tear.
