

NS6130-12-001039

Quick Facts

NEODYMIUM

Praseodymium Oxalate

Product : Neodymium Praseodymium Oxalate

Stock No : NS6130-12-001039

Purity : 99%

Molecular Formula : C6H6NdO12Pr

Form : Powder

Purity 99%

Technical Specification

Molecular Weight	APS
555.25g/mol	40-60µm

Neodymium-Praseodymium Oxalate, also known as NdPr(C2O4)3, is a chemical compound composed of the rare earth elements neodymium (Nd), praseodymium (Pr), carbon, and oxygen. NdPr(C2O4)3 has potential applications in a variety of fields, including material science, chemistry, and engineering. Used in various magnetic applications, such as in data storage and biomedical imaging. These materials have a range of applications, including as catalysts, pigments, and materials for optical and electronic devices.
