

**NS6130-12-001053**

## Quick Facts

Product	:	Manganese Chloride
Stock No	:	NS6130-12-001053
CAS	:	7773-01-5
Molecular Formula	:	MnCl <sub>2</sub>
Purity	:	99.9%

## Technical Specification

Molecular Weight	Density	Melting Point	APS
125.84g/mol	2.98g/cm <sup>3</sup>	652°C	40-60µm

Manganese chloride is a chemical compound composed of manganese and chlorine atoms. It is used as a precursor in the synthesis of various manganese-based catalysts, which are used in a range of industrial applications such as petroleum refining, polymer production, and pharmaceuticals. Manganese chloride is used as a fertilizer to provide essential nutrients to plants, particularly for crops such as wheat, oats, and barley. Manganese is an important micronutrient for plant growth and development, and deficiency can lead to reduced yields and poor quality crops.
