

NS6130-12-001144

PLATINUM IRIIDIUM

Alloy Nanoparticles

Quick Facts

Product	:	Platinum Iridium Alloy Nanopowder
Stock No	:	NS6130-12-001144
CAS	:	7440-06-4/7439-88-5
Form	:	Powder
APS	:	80-100nm

Purity
99.9%

Platinum-iridium alloys are alloys of the platinum group precious metals platinum and iridium. Platinum-iridium is also very resistant to high-temperature electric sparks and is widely used for electrical contacts and sparking points. Platinum-iridium is much harder, stiffer, and more resistant to chemicals than pure platinum, which is relatively soft.

APS 80-100nm
