

Ruthenium on Activated **CHARCOAL** Catalyst

NS6130-12-001229

Quick Facts

Product	:	Ruthenium on Activated Charcoal Catalyst
Stock No	:	NS6130-12-001229
CAS	:	7440-18-8
Molecular Formula	:	Ru/C
Form	:	Powder

Technical Specification

Rh/C	Purity	Color	APS
1%	99.9%	Black	40-60µm

Ruthenium on activated charcoal is a type of catalyst used in various organic chemical reactions. Ruthenium on activated charcoal catalyst is highly active and selective, making it useful for a wide range of organic reactions, including hydrogenation, oxidation, and isomerization reactions. Ruthenium on activated charcoal is used in the production of petrochemicals, such as polymers and synthetic fibers. Ruthenium on activated charcoal is used in environmental remediation processes, such as water treatment and air purification.
