

Alloy Gold Cadmium Nanoparticles

Au/Cd Stock No:

NS6130-12-001280

An alloy is a mixture of chemical elements of which at least one is a metal. Unlike chemical compounds with metallic bases, an alloy will retain all the properties of a metal in the resulting material, such as electrical conductivity, ductility, opacity, and luster, but may have properties that differ from those of the pure metals, such as increased strenath or hardness.

Gold Cadmium Alloy Nanopowder is alloy of gold and cadmium metal. Gold Cadmium Alloy have been utilized for biomedical, automotive, aerospace, and robotics applications.

Technical Specification

Purity 99.9%

APS 80-100nm
