

NS6130-12-001420

Quick Facts

Thallium (III)

Nitrate Trihydrate

Product : Thallium (III) Nitrate Trihydrate

Stock No : NS6130-12-001420

CAS : 13453-38-8
Molecular Formula : TI(NO3)3•3H2O
Form : Powder

Technical Specification

Molecular Weight	Melting Point	APS
444.44g/mol	102-105°C	40-50µm

Thallium (III) Nitrate Trihydrate is a chemical compound with the molecular formula TI(NO3)3·3H2O. Thallium (III) Nitrate Trihydrate is used in the production of materials for electronics, such as conductive glass and thermoelectric materials. Thallium (III) Nitrate Trihydrate is used in the photographic industry to create certain types of photographic emulsions. Thallium (III) Nitrate Trihydrate is used in the production of materials for electronics, such as conductive glass and thermoelectric materials.
