

## NS6130-12-001548

## Quick Facts

## ZINC SILICATE

Micropowder

Product : Zinc Silicate Micropowder

Stock No : NS6130-12-001548

CAS : 13597-65-4
Molecular Formula : Zn2SiO4
Form : Powder

Purity 99.9%

## **Technical** Specification

Molecular Weight	Purity	APS
222.9g/mol	99.9%	40-60µm

Zinc silicate powder is a compound consisting of zinc, silicon, and oxygen. It has a wide range of applications due to its unique properties. Zinc silicate powder is used in the production of ceramics, such as tiles, sanitary ware, and pottery. Zinc silicate powder is used as a pigment in the production of paints and coatings. Zinc silicate powder is used as an insulation material due to its low thermal conductivity. It is used to insulate pipes, ducts, and other equipment that requires thermal insulation. zinc silicate powder has a wide range of applications in ceramics, pigments, fireproofing, glass manufacturing, insulation, and dentistry.
