

**NS6130-12-001569**

## Quick Facts

Product	:	Copper Suspension
Stock No	:	NS6130-12-001569
CAS	:	7440-50-8
Molecular Formula	:	Cu
Form	:	Liquid

## Technical Specification

Molecular Weight	Purity	APS
63.55g/mol	>99%	<50nm

Copper suspensions are mixtures in which tiny particles of copper are suspended in a liquid. They can be used in various applications, including antimicrobial coatings, lubricants, conductive inks, heat transfer, and pigments. Copper suspensions can be used as pigments in various applications, such as paint and coatings. Copper suspensions can be used to create conductive inks for printing electronic circuits and components. Copper suspensions can be used to create coatings for various surfaces, such as medical equipment, door handles, and touch screens.
