Applications

Copper Chromium Iron Manganese Alloy Powder used for Abrasives, Adhesives, Automobile parts, Bearings, Brake linings, Chemicals, Diamond tools, oil filters, Plastics, Powder metallurgy parts, Sintering parts, Watch components applications etc. Used in automotive, aviation, and other industries because of its lightness, high resistance to corrosion and high wear resistance, better fluidity during casting, high strength-to-weight ratio, low thermal expansion coefficient, heat tractability, and improved mechanical properties at different temperatures.

PACK SIZES

25 g / 50 g / 100 g / 500 g / Bulk orders
