

QUARTZ GLASS

Substrate

NS6130-10-1101

Quick Facts

Product	:	Quartz Glass Substrate
Stock No	:	NS6130-10-1101
Purity	:	99.99%
Material	:	100% Pure Quartz

Technical Specification

Length	Width	Thickness	Surface Roughness
10mm	10mm	1mm	0.5nm

Quartz glass substrate refers to a thin, flat piece of glass made from high-purity quartz, also known as fused silica. Quartz glass is a type of glass that is highly transparent, has a high melting point, and is resistant to high temperatures, chemicals, and radiation. Quartz glass substrates are used as a base material for manufacturing semiconductors, integrated circuits, and other electronic devices. Quartz glass substrates are used in medical applications such as laboratory equipment, medical imaging devices.
