

# Iron **SELENIUM TELLURIUM** Sputtering Target

## NS6130-10-1217

### Quick Facts

Product	:	Iron Selenium Tellurium Target
Stock No	:	NS6130-10-1217
Purity	:	99.9%
Form	:	Solid

### Technical Specification

Diameter	Thickness	Molecular formula
50mm	3mm	FeSeTe

An alloy is a mixture of chemical elements of which at least one is a metal. Unlike chemical compounds with metallic bases, an alloy will retain all the properties of a metal in the resulting material, such as electrical conductivity, ductility, opacity, and luster, but may have properties that differ from those of the pure metals, such as increased strength or hardness.

Iron Selenium Tellurium Target is master alloys of Iron, Selenium with Tellurium. Iron Selenium Tellurium Target with applications superconductivity, photocatalytic activity, electrochemical sensing and fuel cell.
