

# GRAPHITE

## Rod

**NS6130-10-1296**

### Quick Facts

Product	:	Graphite Rod
Stock No	:	NS6130-10-1296
CAS	:	7782-42-5
Molecular Formula	:	C
Form	:	Solid

### Technical Specification

Diameter	Length	Purity
6mm	102mm	99.9%

Graphite rods are a versatile material with a range of applications in various industries. Their unique properties, such as high thermal conductivity, low thermal expansion, and good electrical conductivity, make them an attractive material for use in electrodes, heat exchangers, nuclear industry, and machining. Graphite rods are used as a heat exchange material in high-temperature applications due to their high thermal conductivity and low thermal expansion. They are often used in the chemical and petrochemical industries.
