

Pyroitic GRAPHITE Rod

NS6130-10-1554

Quick Facts

Product	:	Pyroitic Graphite Rod
Stock No	:	NS6130-10-1554
CAS	:	7782-42-5
Molecular Formula	:	C
Form	:	Solid

Technical Specification

Diameter	Length	Purity
40mm	300mm	99.9%

Pyrolytic graphite rods have a wide range of applications due to their unique properties and high-performance. Pyrolytic graphite rods have excellent thermal conductivity and are used in electronic devices, such as transistors and power amplifiers, to help dissipate heat and prevent overheating. Pyrolytic graphite rods are used in the aerospace industry for applications such as rocket nozzles and reentry shields. Pyrolytic graphite rods are also used in medical applications, such as MRI machines, due to their high magnetic susceptibility and low magnetic anisotropy.
