Manganese(III) oxide (Mn₂O₃) finds several applications across different industries due to its unique properties. Manganese(III) oxide serves various applications: as a pigment in ceramics and glass, catalyst in oxidation reactions, resistor material in electronics, cathode material in lithium-ion batteries, magnetic material in recording media, agent in environmental remediation, and reagent in organic synthesis. Its versatility and properties make it valuable across industries.

QUICK FACTS

CAS : 1317-34-6
Purity : 99.9%
APS : 30nm
Form : Powder

TECHNICAL SPECIFICATION

Molecular Formula : Mn₂O₃
Molecular Weight : 157.87g/mol

APPLICATIONS

- Ceramics and Glass Industry
- Electronics
- Flame Retardant
- Pigments
- Catalyst
- Rechargeable Batteries
