

# BILIRUBIN

## Micropowder

**NS6130-05-576**

### Quick Facts

Product	:	Bilirubin Powder
Stock No	:	NS6130-05-576
CAS	:	635-65-4
Molecular Formula	:	C33H36N4O6
Form	:	Powder

### Technical Specification

Molecular Weight	Purity	APS
584.66g/mol	99%	40-50µm

Bilirubin powder has been studied for its potential antioxidant and anti-inflammatory properties. It is also used in the production of various pharmaceutical products and as a colorant in foods and cosmetics. Bilirubin powder is used as a natural food colorant, particularly in the production of beverages, such as sports drinks and energy drinks. Bilirubin powder is used in the production of various pharmaceutical products.
