

MANGANESE Hydroxide

NS6130-05-596

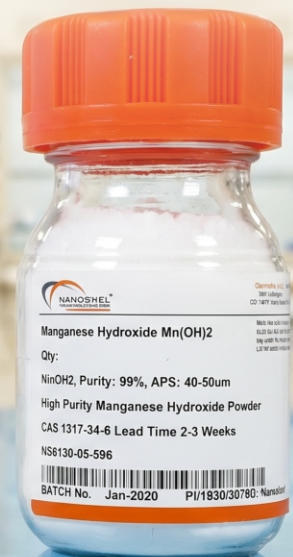

Quick Facts

Product	:	Manganese Hydroxide
Stock No	:	NS6130-05-596
CAS	:	12626-88-9
Molecular Formula	:	Mn(OH) ₂
Form	:	Powder

Technical Specification

Molecular Weight	Purity	APS
88.95g/mol	99%	40-50µm

Manganese hydroxide is a chemical compound composed of manganese, oxygen, and hydrogen atoms. Its chemical formula is Mn(OH)₂. Manganese hydroxide is used in water treatment to remove impurities. Manganese hydroxide is used as a cathode material in alkaline batteries. Manganese hydroxide is used as a pigment in the manufacture of ceramics, glass, and paints. Manganese hydroxide has potential applications in the medical industry.
