

CARBON

Micropowder

NS6130-12-000466

Quick Facts

Product	:	Carbon Micropowder
Stock No	:	NS6130-12-000466
CAS	:	7440-44-0
Molecular Formula	:	C
Form	:	Powder

Technical Specification

Molecular Weight	APS
12.01g/mol	2-12µm

Carbon micro powder, also known as carbon black or carbon nanopowder, is a fine, black powder of carbon particles. It's used in electronics (batteries, capacitors, conductive coatings), polymers (enhancing strength and conductivity), paints and coatings (as a pigment and for durability), lubricants (reducing friction), composites (improving properties), catalysis (support material), and filtration (water and air purification).

Application

- Polymers
- Paints and Coatings
- Electronics
- Filtration
- Composites
- Lubricants
