

NS6130-12-000698

Quick Facts

Product	:	Gallium Granules
Stock No	:	NS6130-12-000698
CAS	:	7440-55-3
Molecular Formula	:	Ga
Form	:	Powder

Technical Specification

Molecular Weight	Density	Melting Point	APS
69.74g/mol	5.9g/cm ³	298°C	1-5mm

Gallium granules are small pieces of the chemical element gallium that are formed into a granular or small pellet form. It is often used in various industrial applications such as in semiconductors, LEDs, and solar cells. Gallium granules used in medical and dental applications, such as in dental fillings and in radiopharmaceuticals for diagnostic imaging.

Gallium has a number of other applications, including in the manufacture of mirrors, as a component in some types of batteries, and in the production of high-strength alloys. It is also used in the oil and gas industry to improve oil recovery. Gallium is used in various medical applications, such as in radiopharmaceuticals for diagnostic imaging and in dental fillings.
