

Gold Antimony

Alloys Powder

Gold Antimony Alloy Powder is unique in that it has very high thermal conductivity combined with high strength at high temperature. These properties, combined with its high strength and low density, make it ideal for special applications like coating blades in gas turbines and jet engines.

Stock No:
NS6130-12-001825

Formula
AuSb

- Coating blades in gas turbines
- It is used in and jet engines

Purity
99.9%

APS : 40-60µm

Form : Powder

APS:
40-60µm
