

NS6130-12-000717

Quick Facts

Product	:	Magnesium Tungsten Powder
Stock No	:	NS6130-12-000717
CAS	:	13573-11-0
Molecular Formula	:	MgWO ₄
Form	:	Powder
Purity	:	99%

Technical Specification

Molecular Weight	Density	APS
272.14g/mol	5.66g/cm ³	10-20μm

Magnesium tungsten powder is a fine powder composed of magnesium tungsten particles. Magnesium tungsten is a chemical compound with the molecular formula MgWO₄. Magnesium tungsten powder has a variety of applications in the fields of ceramics and electronics. It is used as a raw material for the production of high-temperature refractory ceramics, such as magnesium oxide-based ceramics and tungsten-based ceramics. It is also used as a phosphor in cathode ray tubes and television screens, as well as in fluorescent lamps and other lighting applications.
