

NS6130-12-001674

SILVER COATED Copper Powder

Quick Facts

Product	:	Silver Coated Copper Powder
Stock No	:	NS6130-12-001674
APS	:	3-5µm
Purity	:	99.9%

Purity
99.9%

Silver Coated Copper Powder is a composite material consisting of a copper core and a thin layer of silver coating. Silver Coated Copper Powder is a versatile and widely used material due to its excellent electrical and thermal properties, corrosion resistance, and antibacterial properties.

It is commonly used in various industries, including electronics, aerospace, and biomedical. Silver Coated Copper Powder is often used as a conductive filler in adhesive and epoxy materials, such as in printed circuit board (PCB) manufacturing. It can also be used in electrical contacts and switches due to its high conductivity and low contact resistance.

APS 3-5µm
