

NS6130-12-000702

Quick Facts

Product	:	Tungsten Granules
Stock No	:	NS6130-12-000702
CAS	:	7440-33-7
Molecular Formula	:	W
Form	:	Granules

TUNGSTEN

Granules

Purity
99.99%

Technical Specification

Molecular Weight	Density	Melting Point	APS
183.86g/mol	19.25g/cm ³	3695°C	1-5mm

Tungsten granules are commonly used in the production of high-performance alloys, such as those used in aerospace, defense, and electronics industries. Used as a material for electrical contacts and in welding electrodes due to their high melting point and resistance to heat and wear. Tungsten granules are used in the production of darts and fishing weights due to their high density, which allows for a smaller and more accurate product.

- Aerospace and Defense Industry
- Electronics Industry
- Automotive Industry
- Welding Industry
