

# Yellow DEXTRIN Nanopowder

**NS6130-12-000373**

## Quick Facts

Product	:	Yellow dextrin
Stock No	:	NS6130-12-000373
Color	:	Light Brown
Appearance	:	Free flow powder

## Technical Specification

APS	Solubility
60-80nm	90% min

Yellow dextrin is a partially hydrolyzed starch, produced by the dry roasting of starch in the presence of a catalyst. It has several industrial and commercial applications due to its unique properties. Yellow Dextrin Powder is widely used as water soluble adhesives, testifiers and as binding agents in various industries. The adhesive industry uses large amounts of yellow Dextrin in the preparation of liquid and dry adhesives.

### Application

- Adhesives
- Foundry
- Textile
- Printing
- Food Industry
