

# Activated Charcoal Powder

# Activated Charcoal Powder

Activated charcoal is a fine, odorless, black powder often used in emergency rooms to treat overdoses. Charcoal is used in a broad range of applications for both industrial and residential uses that include drinking water purification, ground and municipal water treatment, power plant and landfill gas emissions, and precious metal recovery. Filters made from charcoal can effectively rid your drinking water of certain substances like chlorine and unpleasant odors. But activated carbon filters are not effective at trapping and filtering out all harmful substances.

## Quick Facts

Catalogue No	: NS6130-12-001597
CAS No	: -
Purity	: 99%
APS	: 40-50µm
Form	: Powder

Available:  
**Single-Layer-Graphene**  
**Multilayer-Graphene**  
**Functionalized Graphene**  
**Graphene Reduced Powder**  
**Nanoplatelets, Ink, Paste, Paint**

**Packing Sizes:** 5Gms, 10Gms, 50Gms & Bulk Orders
