Barium Carbonate Powder

Barium Carbonate is typically white in color and odorless or granular. It is almost insoluble in water, insoluble in alcohol and soluble in solution of acids. It is widely used in production of barium salt, dyes, ceramics, enamel, optical glass pesticides, etc. BaCO_3 widely used in production of barium salt, dyes, pyrotechnics, ceramics, enamel, optical glass, pesticide for rat, etc. BaCl_2 widely used in the papermaking, fuel, rubber, plastic, ceramics, refine oil, petrochemical industry. Barium carbonate is mainly used as a raw material in the electrical engineering industries for glass production, and as a raw material in the magnet manufacturing industry.

Quick Facts

Product	:	Barium Carbonate Powder
Color	:	White Powder
Stock No	:	NS6130-12-000922
CAS	:	513-77-9
Purity	:	>99%
APS	:	40-60 μm
Other Metal	:	9000ppm

Technical Specification

Molecular Formula	Molecular Weight	Density	Melting Point
BaCO_3	197.34g/mol	4.43 g/cm $_3$	811°C

Applications

- Used for manufacturing Ferro alloys
- Used for manufacturing glass
- Used in Chloro-alkali industry for cleaning brine
- Used in the brick and tile industry
- Used for removing sulfates for example from industrial effluents
- Used in ceramic industry for producing unique colors
