

Copper Zinc Iron

Oxide Powder

Copper Zinc Iron Oxide Powder with differing combinations of properties, including strength, machinability, ductility, wear-resistance, hardness, colour, electrical and thermal conductivity, hygiene and corrosion resistance. Copper zinc iron oxide powder is commonly used for decorative purposes primarily because of its resemblance to gold. It is also a commonly used to make musical instruments due to its high workability and durability.

Stock No:
NS6130-12-001699

Formula
CuZnFe2O4

- Nuts, bolts, threaded parts
- Terminals
- Jets
- Taps
- Injectors
- Appliance Rim
- Clock Components
- Builders Hardware
- Gear Meters

Purity
99.9%

CAS : 228402-49-1

Form : Powder

APS:
40-60µm
