# Ferro Niobium Powder

Ferroniobium is an indispensable iron niobium alloy with a high amount of niobium content. Ferro Niobium Powder is a Gray metal powder, with a molecular of FeNb.

Ferro Niobium is used mainly to surge the strength of the alloys and it helps to manufacture High-Strength special Steels Low-Alloy (HSLA). These are utilized in automobiles, pipe fabrication, structural steels and stainless steels resistant to high temperatures. It is also employed to fabricate stainless steels, superalloys. This powder helps to enhance the weldability property in the alloys.

## Quick Facts

Product	:	Ferro Niobium Powder
Stock No	:	NS6130-12-001270
CAS	:	11108-69-3
Purity	:	99.9%
APS	:	200mesh

## Technical Specification

Molecular Formula	Color	Form
FeNb	Gray	Powder

- Heavy trucks
- Bridges and flyovers
- Construction cranes
- Amusement rides
- High-strength special steels low-alloy
