## Chelated Nano Calcium Fertilizer 7%

Nano fertilizer, the most important field of agriculture has been to the attention of the soil scientists as well as the environmentalists due to its capability to increase yield, improve soil fertility, reduce pollution and make a favorable environment for microorganisms.

Nano fertilizers in boosting nutrients uptake and nutrients use efficiency, reducing losses through leaching and gaseous emissions along with reducing the risk of nutrient toxicity for ensuring food security achieved through higher productivity and economic turnouts by practicing the sustainable farming practices.

### Analysis:

Calcium	:	7%
---------	---	----

### Characteristics:

Stock No.	:	NS6130-12-001953
-----------	---	------------------

Purity	:	99.9%
--------	---	-------

Solubility	:	Soluble in water
------------	---	------------------

### Main Effects

- Prevention of fruit deformity
- Quality & color improvement of fruits
- Increase in warehousing period of crops
- Decrease in physiological disease such as blossom-end rot
- Prevention of suberization & soft tissues
- Increased resistance to environmental stresses (cold, heat, wind, drought, soil salinity, etc.)

Nanoparticles are also available in fertilizer/ pesticides ultra high purity. Nanoparticles used in research area of strong scientific interest due to the variety of application in agriculture widely used in research area due to their increased reactivity as compared with conventional nano/micron sized particles. We are offering them in different shape & sizes. The costumer value products for their performance by Nanoshel
