Nickel Coated Copper Powder

Nickel Coated Copper Powder is Nickel coated with copper. These have an excellent resistance to reducing media. Nickel Coated Copper Powder used for Silicone rubber conductive filler materials. Thermal conductivity filler material, anti- friction material. Catalyst, electromagnetic shield material.

Quick Facts

Product	:	Nickel Coated Copper Powder
Stock No	:	NS6130-12-001755
CAS	:	N/A
Purity	:	99.9%
APS	:	5-10µm

Technical Specification

Molecular Formula	Molecular Weight	Density	Melting Point
CuNi	122.2394 g/mol	8.5-8.95 g/cm ₃	2031-2255 °C

- Silicone rubber conductive filler materials
- Thermal conductivity filler material, anti- friction material
- Catalyst, electromagnetic shield material
- LCD and LED screens, touch screens, and conductive slurries used in microelectronics
