## Silver Lactate Powder

Silver lactate is an organic chemical compound, a salt of silver and lactic acid with the formula  $\text{CH}_3\text{CH}(\text{OH})\text{COOAg}$ . Silver lactate is used as a surgical antiseptic. It is also used as an antimicrobial agent in the external applications. It is used in the treatment of full thickness thermal wounds. In addition to this, it is employed as a hypodermic injection in erysipelas.

### Quick Facts

|          |   |                       |
|----------|---|-----------------------|
| Product  | : | Silver Lactate Powder |
| Color    | : | Gray/black Powder     |
| Stock No | : | NS6130-12-000947      |
| CAS      | : | 128-00-7              |
| Purity   | : | 99.9%                 |
| APS      | : | 40-60 $\mu\text{m}$   |

## Technical Specification

| Molecular Formula                             | Molecular Weight | Melting Point |
|-----------------------------------------------|------------------|---------------|
| $\text{CH}_3\text{CH}(\text{OH})\text{COOAg}$ | 198.93 g/mol     | 120-122°C     |
