

Titanium Manganese

Alloys Powder

An alloy is a mixture of chemical elements of which at least one is a metal. Unlike chemical compounds with metallic bases, an alloy will retain all the properties of a metal in the resulting material, such as electrical conductivity, ductility, opacity, and luster, but may have properties that differ from those of the pure metals, such as increased strength or hardness.

Titanium Manganese Alloy Powder can be used for a variety of applications such as aerospace and hydrogen storage. Titanium Manganese Alloy Powder used for biomedical applications.
